

When going “green” isn’t good...

Documents submitted to Procurement Services are digitized by scanning on double sided scanners. When submitting documents or PDF files, please avoid using previously printed paper with printing on the reverse.

While we love being green, data submitted on previously printed paper will be picked up during scanning. This makes the digital version of the document larger and the unrelated data can make the file confusing or misleading during audits.

Recycle your previously printed paper, but please don’t reuse it when submitting records to Procurement Services. Thank you!
