New Lab Discount

Giving back to the scientific community is important to Alex Cable, Owner and Founder of Thorlabs, and the employees working at Thorlabs. The new lab discount program is an effort by Thorlabs to contribute to the establishment of new labs both in research and teaching. Understanding that starting a new lab is a huge challenge in and of itself, Thorlabs would like to contribute to those scientists starting a new lab by providing a 10% discount. Discounts are provided within 12 months from the initiation of the laboratory to give the necessary time for planning, initiation, and completion.

Who is eligible for the program?

Your lab can be eligible for the program if

- You are starting a new lab
- You are the principal researcher for that lab
- Your organization is a College/University or a not-for-profit research center

To apply, please fill in the New Lab Investment Form on the next page and submit to your local Thorlabs office.

The New Lab Discount is available when placing orders direct and cannot be combined with any other discount or promotion. If granted, one offer is available per Principal Researcher.

Thorlabs provides over 15,000 products, ranging from mechanical components to advanced measurement systems. This New Lab Discount applies to most Thorlabs products.* If we don't have the product you are looking for, let us know. Over 30% of our new products are inspired by conversations with our customers and vertical infrastructure makes it possible to offer custom products with reasonable lead times.

****The following items are not included in the new lab program:***

Specials, custom orders, and items deemed non-discountable by Thorlabs. Non-discountable items include Nikon imaging objectives and components; deformable mirrors manufactured by our strategic partner, Boston Micromachines Inc.; adaptive optics kits; and system-level products (e.g., laser systems, imaging systems, optical tweezers, etc.). If you have a question about a specific product, please contact your local sales office.
